10+

years of hands-on Odoo experience

30+

Odoo implementations delivered

15+

clients, plus many overseas partners

Everything you need to run on Odoo

361 Techno Consulting is an independent Odoo ERP implementation company based in Gujarat, India. We work with growing businesses in India and overseas, from the first workshop to long-term support.

01

Odoo Implementation

Discovery, setup, data migration, training and go-live, mapped to how your business really works.

02

Inventory & Warehouse

Multi-warehouse, batch and expiry, barcode and reordering, set up so system stock matches the shelf.

03

Manufacturing (MRP)

BoMs, work orders, planning, quality and costing for discrete and process manufacturers.

04

Customization

Custom modules, reports and workflows built cleanly so they survive version upgrades.

05

Integration

Connect Odoo with payment gateways, marketplaces, shipping, WhatsApp, banks and your other software, including SAP-based systems.

06

Migration

Upgrade old Odoo and OpenERP versions, or move from Tally, Excel and legacy ERPs without losing data.

07

Support & AMC

Fixes, small enhancements and user help from a team that already knows your setup.

08

Training

Role-based training so sales, stores, accounts and management all adopt the system.

Odoo AI Automation

AI chatbots that capture leads into Odoo CRM, AI sales assistants, automatic invoice and bill reading, and workflow automation on top of your Odoo data.

NEW

Standard first

We use standard Odoo wherever it fits and customize only where it pays off.

One team, start to finish

The people who study your process also configure, train and support.

Need extra hands?

Hire our Odoo developers and functional consultants for your own projects.

HOW WE WORK

A clear path from first workshop to go-live

Every engagement starts with a free consultation. From there, you always know what is being built, what it costs and when it goes live.

1

Discovery workshop

We sit with each department, map how work really flows today and agree what success looks like.

2

Solution blueprint

A written plan of Odoo apps, customizations, integrations and milestones, with a fixed scope.

3

Build and migrate

Configuration and development in short cycles you can review, plus clean data migration.

4

Train and go live

Role-based training, a parallel run where needed, and a controlled cut-over.

5

Support and grow

Hypercare after go-live, then an AMC for fixes, enhancements and version upgrades.

Industries we work with

FMCG

Manufacturing

Trading & distribution

Retail & supermarkets

Marine

Healthcare

Education

Services

We have implemented Odoo across almost every industry. If yours is not listed, ask us.

Odoo apps we implement

Sales

Inventory

Purchase

Manufacturing

Accounting

HR & Payroll

Point of Sale

eCommerce & Website

Project

Maintenance

Tax localisations we configure include Indian GST with e-invoicing and e-way bills, UAE VAT, Saudi ZATCA e-invoicing, UK Making Tax Digital and Australian GST.

Four ways to work with us

Fixed-scope project

A defined scope delivered in milestones.

Dedicated Odoo team

Developers and consultants on a monthly basis.

Support & AMC

Ongoing fixes, enhancements and upgrade planning.

White-label development

Delivery capacity for other Odoo firms.

RECENT PROJECTS

Odoo projects we have delivered

NETHERLANDS

Renodock: Odoo integrated with a supplier's SAP

A Dutch specialist in loading-dock renovation and industrial doors.

- Odoo built around how a dock and door specialist works
- Integrated with supplier Hörmann's SAP-based systems
- Products configured directly in Odoo
- Leads, quotations and invoicing in one system

LAGOS, NIGERIA

MHARR: one Odoo system for multiple supermarkets

Management had no clear visibility of stock, sales, purchases or expenses across stores.

- Every store brought into one Odoo system
- Stock levels visible for each store
- Sales and purchase updates in one place
- Expenses tracked per store and overall

BHAVNAGAR, INDIA

Marine business: from Excel to multi-warehouse inventory

A very large inventory across multiple warehouses, managed in spreadsheets.

- Multi-warehouse Odoo Inventory setup
- Excel replaced by one live system
- Real-time stock visibility across every warehouse

Pagarav Hospital · Healthcare

Odoo CRM to manage patient interactions and coordinate internal teams.

Rangoli International School · Education

Odoo-based HR system that simplified the school's HR processes.

Questions we hear most

How long does it take?

A focused setup for a trading or services company typically goes live in 4–8 weeks. Manufacturing, multi-company or heavily customized projects take 2–4 months, in phases.

What does it cost?

It depends on the number of Odoo apps, users, customizations and data to migrate. We share a fixed-scope proposal with milestones after a free consultation.

Can you move us from Tally?

Yes. We migrate customers, vendors, products, chart of accounts and opening balances from Tally or Excel, and reconcile them with your accountant.

Tell us how your business runs today

We will review your current process, suggest the right Odoo apps and share a phased plan with timelines.
